

The chart, titled 'ASHC', displays four vertical bars. Each bar is composed of segments of three colors: light blue, medium blue, and dark blue. The segments are separated by thin black lines. The first bar has a small light blue segment at the bottom, followed by a large medium blue segment, and a small dark blue segment at the top. The second bar has a small light blue segment at the bottom, followed by a large medium blue segment, and a small dark blue segment at the top. The third bar has a small light blue segment at the bottom, followed by a large medium blue segment, and a small dark blue segment at the top. The fourth bar has a small light blue segment at the bottom, followed by a large medium blue segment, and a small dark blue segment at the top.

The chart is titled "GOLD". It features two vertical bars. The left bar is composed of five segments of increasing height from bottom to top. The right bar is composed of four segments, with the top segment being the tallest and the bottom segment being the shortest.

A vertical color scale with 8 steps, labeled 1 to 8. The colors transition from dark blue at the top to white at the bottom.
